

# 03d

da zero a tre dimensioni

*from zero to three dimensions*

Ø3d is a former book - mostly an idea or a part of it - and it's conceived as a link between research, professional work and teaching (all together: learning).

Inside, Ø3d has got a treasure of energy due to the

people who took part on it; outside, thanks to the website free diffusion, we wish it will sprawl an open proposal for a sustainable, site specific and responsible contemporary architecture.

As authors, we are what we're doing; and we do know that this work is quite far from the fashionable, global, glamorous, unsustainable and a bit ridiculous star system architect's market: sorry, both of us were born in Italy, a former place itself.

Finally, we think Ø3d is also the best way to express our gratitude to the people having helped and supported ourselves and our work.
